

TEN BILLION COINTM

- On ramping traditional industries onto the blockchain highway

PROBLEM

- Blockchain is the technology of the future that is being adapted by businesses in almost every industry on Earth.
- Blockchain technology is known as the ‘Internet of Value’; and as such, like our current ‘Internet of Information’, every company will need the equivalent of a website or ‘internet presence’.
- Many companies that have been in business for many years need help integrating the technology into their business model.

SOLUTION

- The Chinese government is pushing for companies to integrate Blockchain technology into their business.
- TenBillion Coin is a blockchain that focuses on on-boarding companies with proven business models, track records, and systems of operation in place and not the more speculative projects that proliferate the space.
- We are providing small- to medium-sized companies a method of integrating Blockchain into their companies. These companies creating and maintaining their own blockchain would not be cost effective.
- Using our blockchain technology, we are poised to tackle industries such as real estate, health care, supply chain management, infrastructure security, energy management, sales, and more.

FINANCIAL

- We charge a 30,000 RMB consulting fee for all clients.
- We also charge 100,000 RMB to 3M RMB for a fully-integrated blockchain system based on their needs.
- We require 20% of our fee be payed to us via TenBillion Coin.
- The demand for TenBillion Coin will also exist due to the need for our coin to be used as gas on our network.

COMPETITIVE ADVANTAGE

- Our home base is China, the home of the greatest variety of businesses in the world.
- The national government is itself pushing for Blockchain expansion and proliferation amongst businesses around the country.
- China is a very networked society, and through our extensive network we have relationships with upper-management in many of the largest companies in the country and in a variety of industries.
- We are not looking for new companies or concepts to join onto our blockchain. TenBillion Coin is for traditional businesses that are already mature and profitable to integrate into our network.

PARTNERSHIPS/CLIENTS

- We have three customers already signed on and ready to begin the blockchaining process in the industries of healthcare, petro-chemicals, and textiles:

TOKEN DISTRIBUTION AND USAGE OF FUNDS

Token Distribution

Founders – 20%
Team and Early Contributors – 5%
